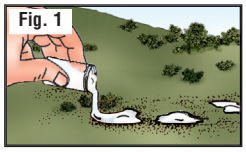
Scenery Details (LK956)

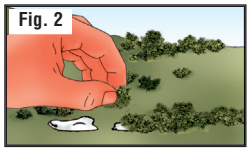
Instructions-Scenery Details

This kit teaches you how to detail a layout. There is enough material included in this kit to detail a 2x2-foot area on an existing layout. If you don't have a layout, practice on a painted piece of cardboard, wood or foam.

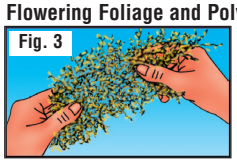
1. Apply Scenic Glue (Fig. 1). Press clumps of Underbrush and Bushes into glue to create shrubs and hedges (Fig. 2).
2. Stretch Flowering Foliage and Poly Fiber until very thin and airy (Fig. 3). Tear apart and press onto layout (Fig. 4).
3. Pinch off a small amount of Field Grass. Roll between fingers and cut to approximately 3/8" long (Fig. 5). Dip cut end in Scenic Glue (Fig. 6), then place on layout (Fig. 7).
4. Use pieces of Fine-Leaf Foliage for saplings and bushes (Fig. 8). Poke hole in layout with straight pin. Dip trunk of saplings in Scenic Glue and plant in hole (Fig. 9).
5. Cut off corner of Yellow Grass Fine Turf bag. Sprinkle Turf on Underbrush, Bushes and saplings for highlights (Fig. 10).
6. Attach Dead Fall to layout with Scenic Glue, some standing and some lying on ground (Fig. 11).
7. For additional adhesion, spray entire layout with Woodland Scenic Scenic Cement (S191), available at your local hobby shop.

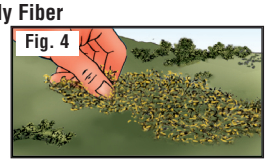
Underbrush and Bushes



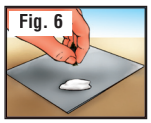


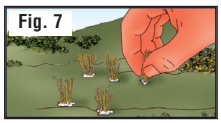
Flowering Foliage and Poly Fiber



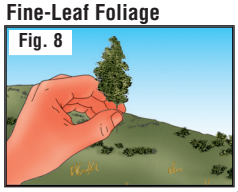


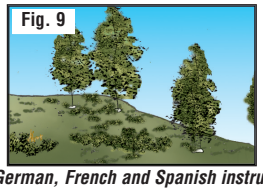
Field Grass





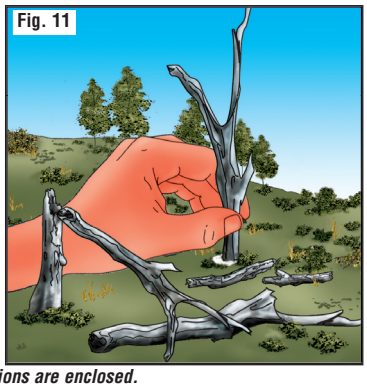
Fine-Leaf Foliage





Yellow Grass

Dead Fall



German, French and Spanish instructions are enclosed.
