- **Coarse Turf** - models tall grasses and weeds Dark Green (T65)
- **Underbrush\*** - models bushes and shrubs Dark Green (FC137)

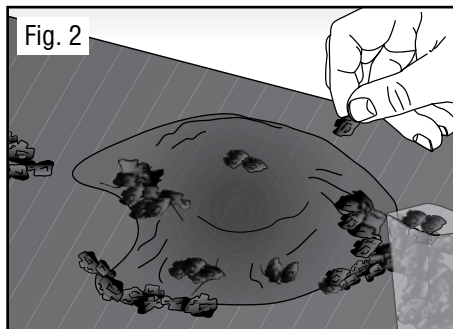

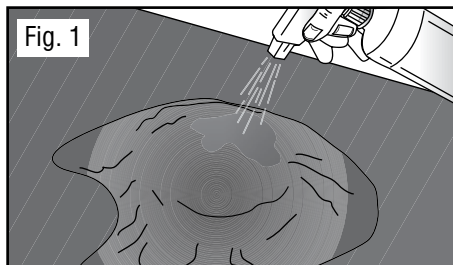

**WOODLAND  
SCENICS**

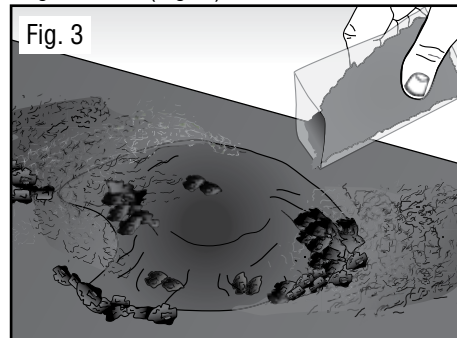

## INSTRUCTIONS

Includes everything needed (various foliage, bushes, shrubs and adhesive) to landscape a 4 x 8-foot area.

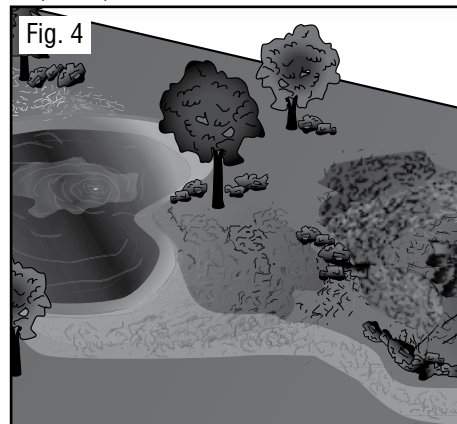

1. Shake adhesive (Scenic Cement) bottle well, remove lid and attach sprayhead.
2. Underbrush is foliage that models shrubs and bushes. Shrubs and bushes grow in groups of three or more. Spray adhesive and apply the Underbrush (Figs. 1 and 2).

3. Spray adhesive and add Coarse Turf to model tall grasses and weeds. This helps blend the bushes and shrubs on the grass mat (Fig. 3).

4. Add paths and highlights with Fine Turf (Fig. 4).

5. Spray adhesive to seal (Fig. 5).

**NOTE:** Avoid spraying adhesive on your water area.

*For additional scenery products refer to the numbers on the front of this instruction booklet. They can be purchased at your local hobby shop or visit our Web site at [www.woodlandscenics.com](http://www.woodlandscenics.com).*
