Clump-Foliage* Medium Green (FC683), Conifer (FC185)

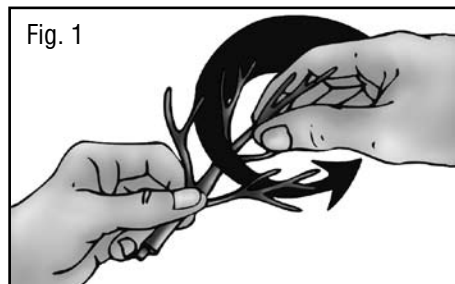

**WOODLAND
SCENICS**

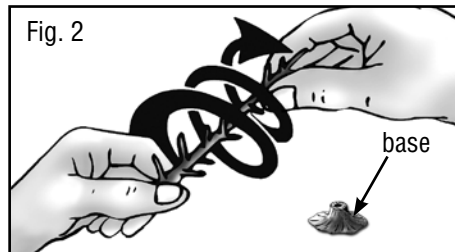

INSTRUCTIONS

Includes everything needed to make 27 deciduous and pine trees for a 4 x 8-foot area. Tree sizes range from 2½" - 6".

1. Remove optional base and set aside.
2. Make Armatures three-dimensional.
 - a. Deciduous - twist and bend in variety of tree shapes (Fig. 1).

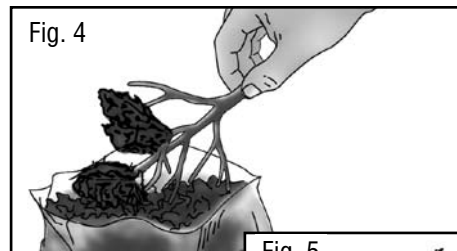

- b. Pine - twist branches in spiral motion from bottom to top (Fig. 2).

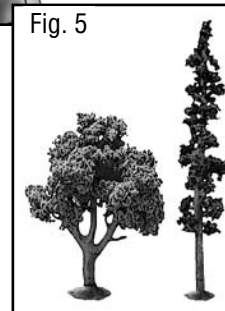

3. Apply Adhesive to Armature branches (Fig. 3) and set in base. Dry for 15 minutes or until clear and tacky.

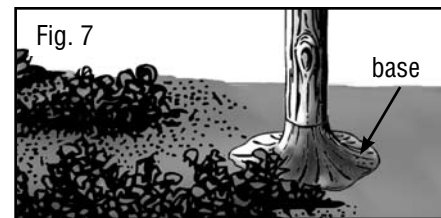

4. Break the foliage into pieces no larger than 3/4". Dip Armatures into Clump-Foliage and shake off excess (Fig. 4 and 5).

5. For permanent placement, poke a hole in the ReadyGrass Vinyl Mat or mound. Apply adhesive on Armature pin and hole, then plant tree (Fig. 6).

6. If using the base, apply adhesive to the base and place on the ReadyGrass Vinyl Mat or mound. Then plant your trees in the base (Fig. 7). For temporary placement of trees don't use adhesive on the base. Attach trees to the base and set on the grass mat.

For additional scenery products refer to the numbers on the front of this instruction booklet. They can be purchased at your local hobby shop or visit our Web site at www.woodlandscenics.com.
