

Paving Tape ST1455

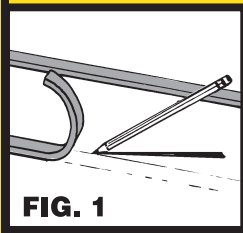

FIG. 1

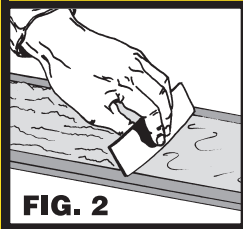

FIG. 2

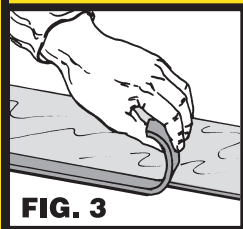

FIG. 3

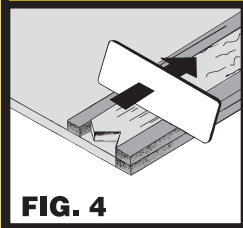

FIG. 4

The Woodland Scenics Road System is an easy way to build roads, parking lots, sidewalks or curbs on any surface. Use the following Road System products to create a smooth road surface:

- **Paving Tape ST1455**
- **Smooth-It ST1452**
- **Top Coat Asphalt ST1453 or Concrete ST1454**

INSTRUCTIONS

To build streets, roads and sidewalks/curbs:

1. Determine width of street or road (see chart below). If you want curbs and/or sidewalks, include those widths in the total measurement.
2. Draw lines on layout the proper distance apart as determined in step 1.
3. Remove backing on Paving Tape and press Paving Tape to layout along outside edges of drawn lines (Fig. 1).
4. Mix a batch of Smooth-It and, using Spreader (included in this package), evenly spread Smooth-It between strips of Paving Tape (Fig. 2).
5. Allow Smooth-It to dry 20-30 minutes.
6. If you are going to build a sidewalk/curb, leave tape on edge or edges where you will build sidewalk/curb and go to step 8. Otherwise, carefully pull tape away from Smooth-It (Fig. 3). Do not leave tape in place longer than necessary.
7. Sand and paint with Top Coat Concrete or Asphalt to desired color.
8. To build sidewalks/curbs, in same manner as above, place one strip of Paving Tape on top of existing strip or strips (Fig. 4). Determine width of the sidewalk/curb and on the previously paved area, place a single strip of tape the length of the sidewalk/curb (Fig. 4). Allow Smooth-It to dry one hour before laying Paving Tape on top.
9. Spread Smooth-It between tape strips (Fig. 4). Allow to dry 20-30 minutes and remove tape (Fig. 3). Allow to dry; sand and paint as in step 7.

Scale	City Street	Country Road	Highway Lanes	Sidewalk
Prototype	30'	18'	12-18'	4'
HO	4-1/8"	2-1/2"	1-5/8-2-1/2"	1/2"
N	2-1/4"	1-3/8"	7/8-1-3/8"	1/4"

(Note: Figures are rounded to nearest 1/8").
