

ROAD RISER™ - C1181

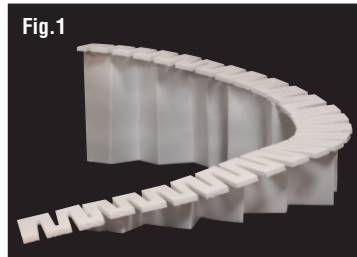

INSTRUCTIONS

Road Risers make it easy to add roads and highways to terrain layouts. The flexible design simplifies modeling winding and hilly roads.

1. Add Road Risers during terrain building. For elevated roads, use with 2" Support Panels (C1172) (**Fig. 1**).
2. For longer roads, butt sections snugly together end-to-end. Cut to desired length with a hobby knife, Foam Knife (ST1433) or Hot Wire Foam Cutter (ST1435). Adhere together with Sticky Spots™ (C1167).
3. Cover Road Risers with Foam Putty™ (ST1447), Plaster Cloth (C1191-C1193, C1203), or Shaper Sheet™ (C1178, C1179) and Shaper Sheet Plaster (C1180).
